KEL Introduces TMC Series Connectors for Appliance Wiring High Speed Signal Transmission

KEL Corporation will begin sales of a new connector series as follows. This product launch is part of an aggressive R&D aimed at generating more than 30% of net sales from products developed within the past three years. As a specialist in connectors, KEL is dedicated to using the latest advance in technology to manufacture and sell connectors that meet the recent trends of electronics products becoming lighter, slimmer, shorter and smaller.

The TMC Series Connectors for Appliance Wiring High Speed Signal Transmission

【Features】

- 0.5mm pitch board-to-cable connector
- Designed for high speed differential transmission (TMDS, LVDS)
- Can use a mixture of miniature coaxial cable and discrete cable
- Realized the excellent strength in connectors and noise suppression by covering the entire connector with metallic shell
- Equipped with a reliable lock mechanism that can easily be attached and removed
- Comes in two types, 21 and 51 poles
- Designed for RoHS

【Targets】

Imaging devices market
Electronic devices market
Office equipment market
Medical equipment market
